1 Watercolor

Description

This technic use water soluble ink applied with a brush.

Figure 1: example Watercolor

How will we do it

The splats used will be created with procedural noise in order to not have the same splat. We have to play with the transparency to have this effect of water and wet effect. These splats will be placed by a noise with low frequency and less convolution has possible.

2 Pointillism

Description

This technique consists to paint with only spots of different color.

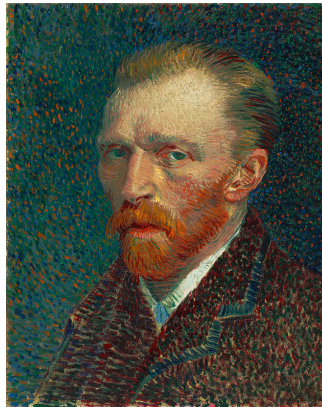

Figure 2: example Pointillism

How will we do it

The splats will be simple dot or many dots that will placed with a medium/high frequency.

3 Hatching

Description

The technique consists to paint/draw with lines.

How will we do it

The splats will be just one line or many lines. The noise will be at medium/high frequency.

Figure 3: example Hatching
